ZeroDivide & Our Communities

Transformation through Technology

eOpportunity

eDemocracy

eHealth

ZeroDivide - San Francisco Based Non-Profit

MISSION

To help underserved communities realize the transformative power of technology to improve economic opportunities, civic engagement and health access in their communities.

VALUES

LEADERSHIP
EQUITY
CULTURAL COMPETENCE
COLLABORATION
EXPERIMENTATION

PRINCIPLES

SOCIAL JUSTICE OUTCOMES
COMMUNITY ASSET BUILDING
SUSTAINABILITY
SCALE & SYSTEMS IMPACT

Key Questions

- *How best to promote community engagement and participation*
- *What role does government play in promoting and supporting change at the community level*
- *What technical and analytical resources can government provide*
- *How can local health organizations, academia, and others partner to support change at the community level*

**SO, WHY IS THIS IMPORTANT TO
ZERODIVIDE?**

patientslikeme®

diabetic  connect

how do these devices help us achieve ehealth equity?

HOSPITALS

**12% use
Blogs**

**46% use
YouTube**

**64% use
Twitter**

**84% use
Facebook**

DOCTORS

60%
of doctors say social
media improves the
quality of care
delivered to patients

40%
do not believe there is
value

Consumers

**1 out of 3
healthcare
consumers
report
using
social
media to . .**

Consumers

**Share
information
about their
symptoms**

**Track or
monitor a health
condition**

**Seek health
information or
find medical
treatment**

**Share feelings
about a doctor,
treatment,
medicine**

Variability by age

Seniors

Use Internet to manage their health & communicate with their doctors

Young Adults

Are likely to use social media to share health information

Variability by race

Research Presented by Kaiser Permanente at DiversityRx Conference March 11, 2013

1

Racial/ethnic disparities in kp.org registration exist, even after accounting for economics/education factors.

- African-Americans were most heavily impacted.
- Latinos are close behind
- Asian/Pacific Islanders are also underrepresented

2

Patients not preferring English are less likely to use kp.org.

- Members preferring Spanish as a written language were most heavily impacted.

3

Secure email use is associated with quality of care improvement for all racial/ethnic groups.

- Secure email use improves quality of care outcomes as measured by HEDIS across the major racial ethnic groups studied.

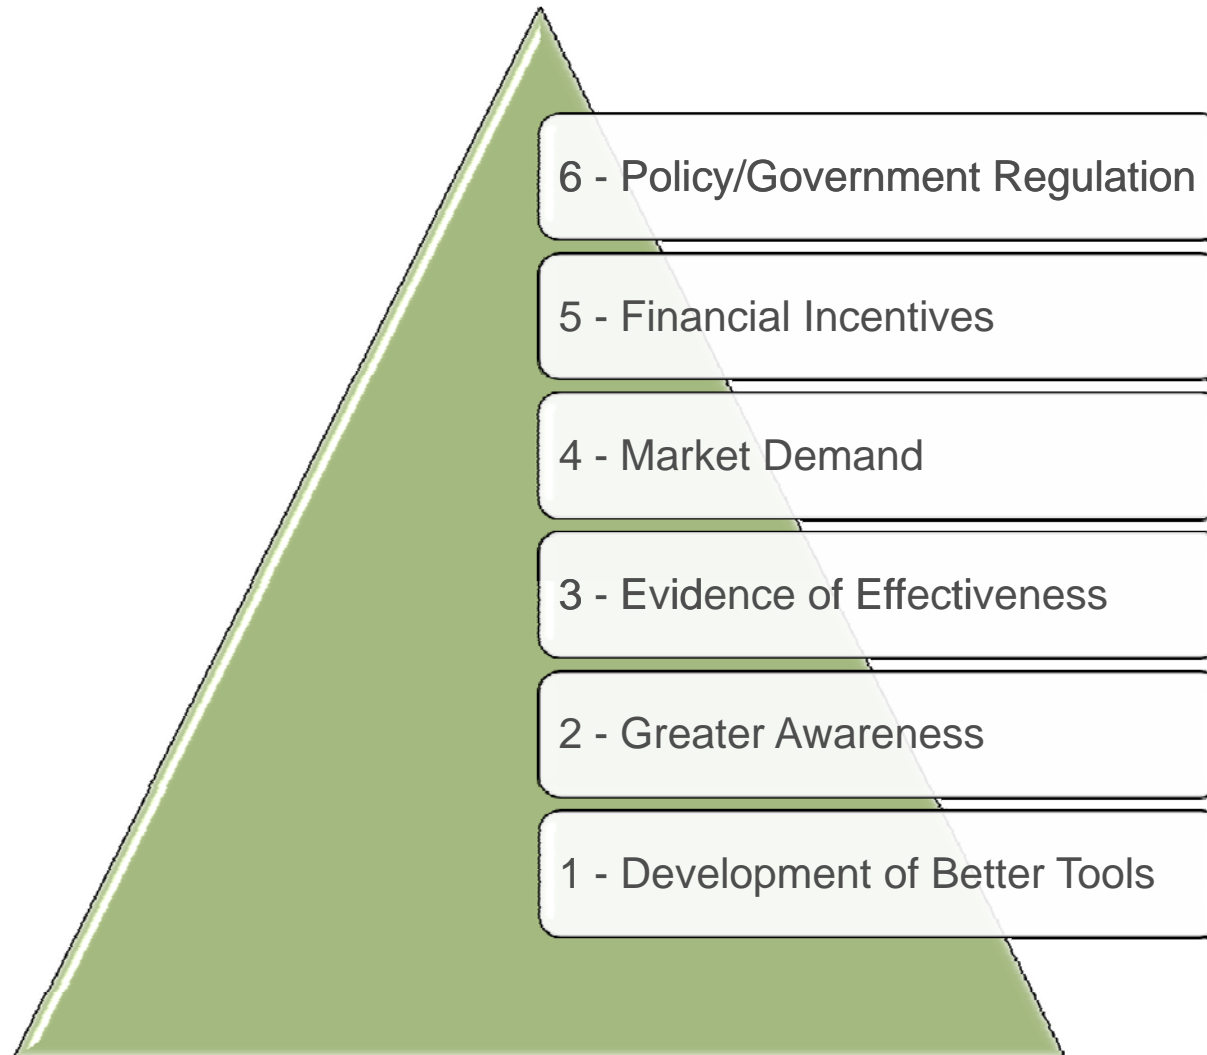

**HOW DOES THIS INFORM OUR
KEY QUESTIONS?**

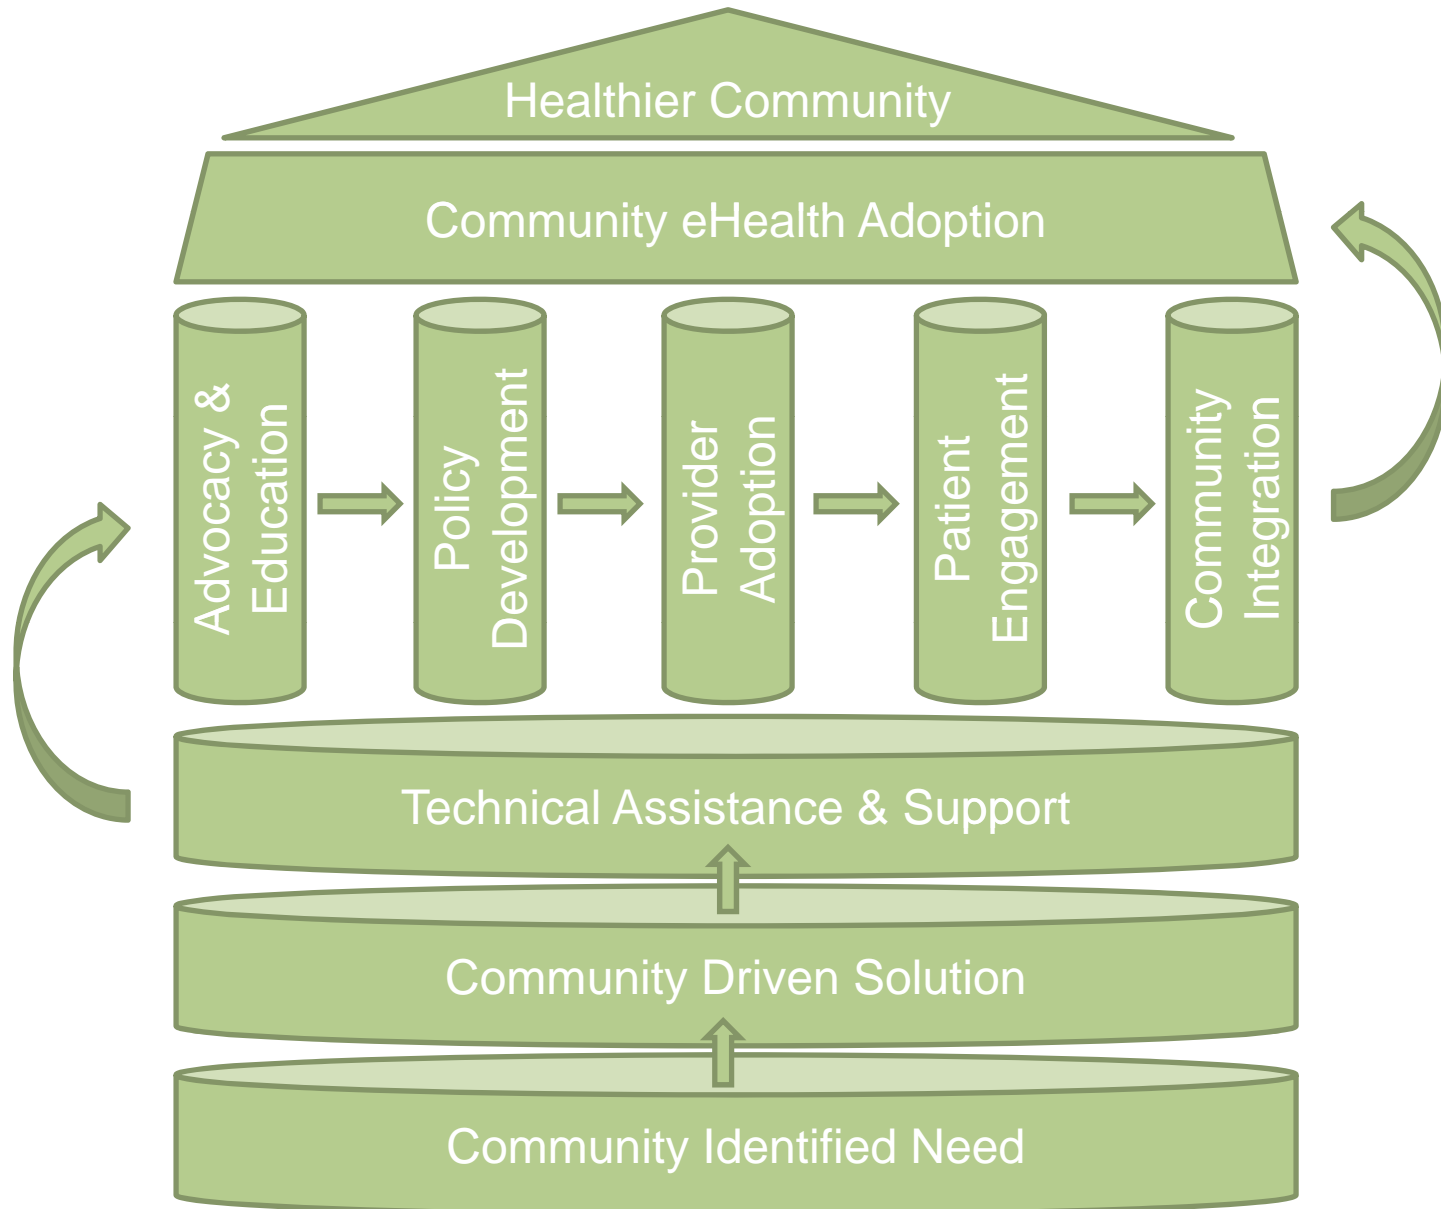

Ranking of what is most needed to advance eHealth from Bottom Up

ZeroDivide's Program Development Approach

ZeroDivide Community eHealth Strategies

- Policy & Advocacy
 - Establish Strategic partnerships across industries
 - Work together to influence policy
 - Individually and collectively advocate for change
- Technology Demonstration
 - Develop technology resources and capacity at local level
 - Requires FUNDING and SKILL
 - Deploy technology resources and provide training and support
 - Requires COMMUNITY BASED SUPPORT – Outreach workers, connectors
- Education and Outreach
 - Inform communities of the importance and value of technology and data collection
 - Increase access to eHealth resources
 - Establish trust, collaborative networks, and community governance
