What is the Commission?

• The Commission is the result of discussions on opportunities for better using evidence to inform decision-making, whether in budget decisions or day-to-day management.

• Created by legislation co-sponsored by Speaker Paul Ryan and Senator Patty Murray, enacted March 30, 2016 (P.L. 114-140).

• Members appointed by the President, Speaker of the House, House Minority Leader, and the Senate Majority and Minority Leaders – 1/3 on privacy; 2/3 experts on program administration, data, or research.

• We provided our report to the President and the Congress on September 7, 2017.
Why Now?

• Government will always need relevant, high-quality, and credible evidence

• Evidence can and should be used to help inform policymakers about important decisions before they are made, and retrospectively to improve future decisions after they are implemented

• Evidence can support both accountability and continuous learning in government
The Commission’s Process

• The Commission engaged in an **8 month fact-finding process** to gather input:
  • 7 Public Meetings with 49 invited witnesses
  • 3 Public Hearings in DC, Chicago, and San Francisco with 37 witnesses
  • Request for Comments in the *Federal Register* with more than 350 submitted comments
  • CEP Survey of 209 Federal offices
  • More than 40 meetings with other groups

• Following public input, the Commission ran a deliberative review process to consider all of the input received and distilled areas of agreement into the Commission’s **22 recommendations**
The Report – Major Themes

• **Improved Access to Data** – Laws and policies are not currently optimized to support the use of data across programs or to maximize privacy

• **Stronger Privacy Protections** – protections today are applied unevenly across government, and not dynamic enough to meet the changing risks associated with the use of data

• **Greater Capacity** – filling the existing capacity gaps across institutions and actors inside and outside government, including the establishment of a single entity to better support access and privacy
Recommendation Highlights

• **Improved Access to Data** –
  o Establish the National Secure Data Service by bringing together existing expertise (2-1, 2-2)
  o Address inconsistencies and barriers in law for better use of existing data (2-3, 2-4, 2-5, 2-6, 2-7)
  o Streamline the process by which researchers access data (2-8)

• **Stronger Privacy Protections** –
  o Conduct and disclose comprehensive risk assessments for publicly released de-identified data (3-1)
  o Improve protections with better technology and greater coordination (3-2, 3-3)

• **Greater Capacity** –
  o Strengthen capacity for evidence building, particularly program evaluation, by ensuring sufficient resources and coordination both within and across departments (5-1, 5-2, 5-3, 5-4, 5-5)
Recommendations to Improve Secure, Private, and Confidential Data Access

• Establish a **National Secure Data Service** to facilitate access to data for evidence building while ensuring privacy and transparency in how the those data are used.

• Require **stringent privacy qualifications** for acquiring and combining data for statistical purposes at the NSDS.

• **Review and revise laws authorizing Federal data collection and use** to ensure that limited access to administrative and survey data are possible under strict privacy controls.

• **Develop a uniform process for external researchers** to apply and qualify for secure access to confidential government data for evidence-building purposes.
Recommendations to Modernize Privacy Protections for Evidence Building

• **Require comprehensive risk assessments on de-identified confidential data** intended for public release to improve how data are protected and risk is managed

• **Adopt modern privacy-enhancing technologies for confidential data** used for evidence building to ensure the government’s capabilities to keep data secure and protect confidentiality are constantly improving

• **Assign senior officials the responsibility for stewarding data** within government departments

• **Codifying policies for maintaining integrity and objectivity** in Federal statistics to promote continued trust in the accuracy of information being used to guide government decision making
Recommendations to Strengthen Federal Capacity for Evidence Building

- **Identify or establish a Chief Evaluation Officer** in each department to coordinate evaluation and policy research and to collaborate with other evidence-building functions within Federal departments.

- **Develop learning agendas in Federal departments** to support the generation and use of evidence to address the range of policymakers’ questions.

- **Improve coordination of government-wide evidence building** by directing OMB to facilitate cross-government coordination.

- **Align administrative processes** with evidence-building activities, including those related to the approval of information collections and the procurement of services for evidence building.

- **Ensure that sufficient resources are available** to support evidence-building activities, including resources to support implementation of the recommendations of the Commission.
Recommendations Related to State-Collected Administrative Data

• Ensure that *state-collected administrative data on quarterly earning are available* for statistical purposes only and made available through a single Federal source.

• Direct Federal departments that acquire state-collected administrative data to make the data available for statistical purposes. Where there is substantial Federal investment in a program, *Federal departments should, consistent with applicable laws, direct states to provide the data necessary to support evidence building.*
Recommendations Related to the National Secure Data Service

- NSDS should facilitate secure data, with stringent privacy protection standards, develop and implement state-of-the-art methods to safely combine data, and apply cutting-edge technologies.
- NSDS should also have capacity to provide technical and analytical services on a fee-for-service basis for states and other jurisdictions.
Where Do We Go From Here?

• The Commission’s final report was released on September 7, 2017

• The Commission will sunset on September 30, 2017 at which point the Bipartisan Policy Center will continue to advance the recommendations developed by the Commission

• Legislation is under development, and a hearing is being scheduled on the report in later September.

• Most importantly, we encourage all of you to serve as champions for evidence policymaking in your own organizations.
