FHIR Timeline and Federal Regulations

CMS and ONC have identified FHIR as the foundational standard to support data exchange via secure application programming interfaces (APIs).

CMS identified FHIR in their final rules to establish a future where data flows freely and securely between payers, providers, and patients and to achieve truly coordinated care, improved health outcomes, and reduced costs.

HL7 Standards Development Lifecycle

- Industry engagement throughout
- Free and open licensing for work products
- Leverages iterative testing and improvement of standards
- Enables efficient, 21st century business processes
- **Produces implementation guides for industry with the details and guidance necessary, precluding the need for operating rules**
