

ICD-11 Implementation Planning: Continuity and Sustainability

Continuity and Sustainability over Time

We've identified research questions, stakeholders, benefits and other issues.

What should be done to maintain the momentum?

- Who is best positioned to lead the overall project or specific parts of the project?
- Are there organizations and agencies that **MUST** be included for the longitudinal success of ICD-11 implementation?
- What is needed in the United States that is fundamentally different from other countries?
- Are there essential next steps in priority order?
