

CORE Certification Enforcement

Committee on Operating Rules for Information Exchange

Facilitating the development of consensus-based business rules to drive interoperability.

Federally designated by the Department of Health and Human Services (HHS) as the National Operating Rule Authoring Entity for all HIPAA mandated administrative transactions.

Convenes industry to accelerate automation and develop business processes that streamline healthcare for patients, providers and health plans while remaining technology- and standard-agnostic.

Multi-stakeholder Board Members include health plans, providers, vendors and government entities. Advisors to the Board include standard development organizations.

Organizations that **create, transmit or use** the healthcare administrative and financial transactions addressed by CORE Operating Rules can become CORE-Certified.

To achieve certification, organizations must:

- ✓ Abide by CORE Certification Policies
- ✓ Adopt CAQH CORE Operating Rules
- ✓ Pass CORE Certification Testing
- ✓ Attest to HIPAA compliance

It is the responsibility of a covered entity to ensure business associate compliance with HIPAA requirements; many entities require CORE Certification as a condition of contracting.

How is CORE Certification enforced?

CORE Enforcement Policy

- The CORE Enforcement Policy allows the industry **to monitor, regulate and correct itself** to avoid or prepare for enforcement audits and penalties.
- The enforcement process is a **progressive and collaborative approach**. An enforcement complaint requires documentation of five instances of non-conformance.

Which organizations can file a complaint of non-conformance against a CORE-certified organization?

- Any healthcare provider that is an end-user of a CORE-certified product/service if the provider believes the CORE-certified organization is not conforming to the CORE Operating Rules.
- Any CORE-certified organization involved in an alleged non-conformant transaction, e.g., vendors, clearinghouses, health plans, etc.

Three organizations submitted enforcement complaints in the past three years. All were resolved through collaboration among all involved parties.

CORE Certification Enforcement Process

1. Check if your trading partner is CORE-certified – only Certified entities are subject to Enforcement.
2. If your CORE-certified trading partner is non-conformant with the CORE Operating Rules, first try to privately resolve disputes using the following the Enforcement Template Letter.
3. If your CORE-certified trading partner is not cooperating with your request to comply with a CORE Operating Rule(s), begin to document instances of non-conformance.
4. After five documented instances of non-conformance, complete a Request for Review of Possible Non-Conformance Form for each applicable transaction(s) of CORE Certification.
5. CORE facilitates discuss and resolution amongst the trading partners to resolve the non-conformance complaint. If the CORE-certified trading partner is unable to or refuses to resolve the non-conformance complaint, CORE can revoke its CORE Certification Seal.
6. If your trading partner(s) is not CORE-certified, or if you are unsure where to start, contact core@caqh.org to setup a 1:1 call to identify gaps.
 - Encourage your trader partner to become CORE-certified.
 - Learn more about the rule sets for which your trading partner is CORE-certified.
